VARNISH**
Virtually Disappears.
The Difference is Clear!

ALPHA-PRO® WHITE VARNISH

ALPHA-PRO® White Varnish contains 5% sodium fluoride. It is used in the treatment of dentinal and post-operative sensitivity. ALPHA-PRO® White Varnish when applied practically becomes invisible, unlike traditional varnishes that cause unsightly yellow coloring of the teeth. ALPHA-PRO® White Varnish sets immediately on contact with saliva, leaving a smooth, thin layer.
