

FREE WEBINAR

Key success factors: Showcasing the breadth of EthOss synthetic bone graft use from pathology and advanced implantology to All-on-X cases.

Presented by:

Dr. Frank Chang

Oral and Maxillofacial Surgeon

BDS (Otago), MBChB (Auckland), FRACDS, OMS

Presented by:

Dr. Michael Tang (UK)

BDS(Gla) MFGDP(UK)RCS PgDip(ImplDent)

MSc(ImplDent) FCGDent

Join Drs Michael Tang (UK) and Frank Chang (AUS) for an examination of the range of different advanced clinical scenarios where they are finding success using EthOss. This webinar is ideal for clinicians interested in expanding their knowledge of how and why EthOss synthetic bone graft (which generally does not require a separate membrane) is suitable for advanced, complex cases and the results that are possible.

Dr Tang, an advanced implant GP in the UK, routinely uses EthOss for his patients, including:

- Cases with advanced to significant defects
- All-on-X cases
- A more mature patient cohort

Dr Chang, an Oral & Maxillofacial surgeon in Perth, is routinely using EthOss for:

- Pathology cases
- Advanced implantology cases
- Diverse age range of patients
